

Free support services

When someone in the family is experiencing memory changes, it's common to feel unsure about what comes next.

As a patient living with dementia and using traditional Medicare, you are eligible for free support services!

CNMRI 2.0 is partnering with Craniometrix to provide these services.

With the help of a **dedicated Care Navigator** you'll receive:

A custom plan, built around your priorities

Access to expert guidance on everything from legal planning to daily life

A 24/7 helpline to provide support anytime

You'll receive a **dedicated Care Navigator**, trained by Johns Hopkins, giving you and your family **peace of mind** knowing proactive measures have been put into place to safeguard your future!
