

# Free Dementia Support Services For Qualifying Patients

Once your provider at CNMRI 2.0 has made a referral you can contact Craniometrix

## What is GUIDE?

The Guiding an Improved Dementia Experience (GUIDE) model is a new Centers for Medicare and Medicaid (CMS) program that aims to reduce strain on unpaid caregivers, and enable people living with dementia to remain in their homes and communities.

The program is funded by Medicare for enrolled patients. CNMRI 2.0 is working with Craniometrix to deliver this caregiver support.

This model provides individuals and families with an interdisciplinary team to provide care navigation, education, support and respite care.

## GUIDE Benefits for Patients

\*Respite care is available for individuals enrolled in the program that have moderate to high dementia care needs and receive support from an unpaid caregiver, such as family members

What support is offered through the GUIDE program?

The Guide program is built around 9 service areas which we have partnered with Craniometrix to deliver:

- Comprehensive assessment
- Care planning
- Ongoing monitoring and support
- Medication reconciliation and management
- 24/7 helpline access
- Care coordination and transitional care management
- Referrals and coordination for services and support
- Caregiver education and support
- Respite services
- CNMRI 2.0 will still provide all medical care for the patient. This includes any medication, tests or other care related to the patient's dementia.

## What does Craniometrix do?

Craniometrix will provide support for caregivers. They will also help the caregiver access services to meet the patient's social needs. This support may include:

- Up to 80 hours of annual respite care funded by Medicare (subject to assessment) to support caregivers in taking a break.
- 24/7 access to advice and support
- Regular assessment of patient social needs and caregiver needs
- Education and support groups for caregivers
- Support accessing community services

## What happens after your provider refers you to Craniometrix?

You can contact Craniometrix to schedule an onboarding call at **(302) 207-3988** or conveniently self-schedule your enrollment appointment at: [bit.ly/cnmri20-schedule](http://bit.ly/cnmri20-schedule)
